

LSA 0100-0630

Liquid separators

VACUUM SOLUTIONS

Busch liquid separators are placed upstream of the vacuum pump and protect it from damage caused by contaminants in wet processes such as liquids.

Ideal protection

Two-stage separation process of contaminants for longer lifetime of the vacuum pump

High performance

Two-chamber design and automatic draining system for a high level of liquid removal, no interruption of the process gas flow

Easy servicing

Glass cylinder for easy check of the liquid level, snap closure for easy removal of lower parts for cleaning purposes
